

Dr. Johan Weemaes

Johan is the Principal dentist of Avenue Dental Maroochydore.

He is a member of various study clubs, a graduate of the International Academy of Advanced dentistry, a member of the International Team for Implantology, a Diplomate of the International Congress of Oral Implantologists and has completed his Masters of Oral Implantology at Goethe University in Frankfurt, Germany.

In essence, he loves what he does and continuously looks to improve himself to the highest standard. His extensive training has progressed him to train others and lecture on various topics to do with smile makeovers and surgical placement of implants including 'all on 4' techniques, sinus lift grafting techniques, and other complex techniques.

Location

Sunshine Coast

Date

12 - 13 Feb 11 - 12 Jun

Basic implant theory with digitally guided implant hands-on and a live surgery

Introduction to Surgical and Restorative Concepts in Implantology

A one day of theory showcasing the basic principles behind case selection, risk assessment, surgical techniques, management of complications, second stage surgical procedures, and restorative principles.

This course will help dentists of any experience level begin their journey with implantology whether it be tackling simple surgical cases or restoring their first implant. This course will cover principles behind both freehand surgical placement as well as the fully guided surgical placement of implants with DIO.

The second day will consist of a live case surgery for participants to observe to reinforce the learning principles. Participants are encouraged to bring candidate patients along to have supervised surgical placement of implants at the surgical center after planning via DIO.

Course Schedule

DIO IMPLANT

Day 1		Day 2	
09:00 ~ 10:30	<ul style="list-style-type: none">- Why place dental implants and the future of our patients- Implant design- Classification systems and terminology of Implant prosthodontics- Timing of Implant placement protocols- Risk assessment - surgical, aesthetic	09:00 ~ 09:30	Case review
